## LTT LIGHT THERAPY EASILY DONE

http://www.lichthansa.de / com. e Mail. info@lichthansa.de phone (+49) 0421 - 2210040 -2210422 faxes. (+49)042 - 2210041 - 2210426

### SPECIAL LTT INFO 01

#### **Dr. Apul - Ltt - light-thermo-therapy © \* with visible light-radiation (SLS-IR) without ultraviolet - the fashionable treatment**

The visible rays of light (=SLS) distinguish themselves through Inkohärenz and the polychromatisch. She/it is based on the effect-effect of the sun, influences through your distance on the earth 150 \* 106 km. That is on intensity and effectiveness of the sunbathe-radiation, one models with the **Ltt instrument** © artificially. Our earth receives 2,5 billionth at share of the suns radiation-energy. These rays are used by matter and creatures of all type as main-source of energy and are stored. The light of the sun covers the entire spectrum of the high frequency-radiation, the long waves, cosmic ultra-radiation, at the short-wave up to the x-radiation from. For biological purposes, the three wavelength-areas play area ultraviolet, visible and infrared the most important role. In each case, it comes for the effect on the light-intensity in the yellow - blue - green area at.

Spreads also far, but in the clinical results not yet quite undisputed, the fight of that is season-ale dependent depression (SAD) with spectrum-lamps with defined Lux zahl. In addition, there are studies to the acne-therapy, with which one tries the visible area through yellow-members of the Greens Party irradiation to treat.

As the effect of the light-thermo-therapy © is not uniform visible light-radiation (SLS) with ultraviolet radiation over the entire spectral-area. Light-thermo-therapy is similar the heat-radiation of the sun. Physically at it is looked the visible light-radiations (SLS) so relative, that sources emit the light-thermo-therapy simultaneous infrared, according to wavelength, visible light-radiation (SLS) has different effects. The visible light-radiation (SLS) has a profoundly going effect that can penetrate the preponderant portion into the skin. At least that for several areale manner application, to reach a high effect-intensity and therapeutic dose, enables.

The visible - and infrared light-radiation (SLS) is the heat-radiation of the sun with it one of the most natural heat-sources. The visible

Light-radiation (SLS) with the Dr. Apul - Ltt - light-thermo-therapy - instrument has measured itself well. That has proven for the therapy as well as in the local also as in the completely-body-area to be the optimum. Ltt - instrument is and works Hyperthermie through the emerging cloth in arealer manner. The relaxation the musculature, inflammation-inhibition and pain-relief, with circulation-promoting regeneration is increased. Through the Dr. Apul - Ltt-Lichtthermotherapie - instrument can originate easy reddening at the skin-surface. Through an automatic Abschaltung of the

appliance, no Überhitzung of the skin-surface can occur. , Duplicates - Dosiemetrie.

The application-areas were privileged the Ltt-Gerät treated with the pain-therapy and against depressions, such examples are observed more frequently.

#### **Analgetische application of Dr. Apul - Ltt light-thermo-therapy ©**

With the light-thermo-therapy, pubs run out reaction of the thermo-regulation normally. So, also an elevated skin-circulation can occur with Erwärmung of the skin of an extremity for example, but also to a reduced muscle-circulation of that in deeper sections under the application-position. Partially, the analgetische also took place indirectly over one, not rarely first step-by-step gaining alleviation the pain causing as well as pain pathological changes and symptoms. The immediate local effects are dose and time-dependent. Superficial tissue-temperatures over 38.0 degree Celsius can be endured without risk of the tissue-damage only for a short time. The temperature-bearable-ness borders Areas of the body are quite different for individual therapy.

Effects caused for the reflexively, that is with a spatial distance between application - as well as primary effect place and the painful regions to be influenced, normally only restricted reaction-possibilities are given.

Circulation-supports belong to them at the pelt and mucous membranes or influence of the tone of cross-striped and smooth musculature. Whether and in what way the analgetische effectiveness has to do with these reactions, is still unsolved at present.

Beside the topography of the pain-effects -direkt locally at the application place - or reflexively in other regions the Analgetische can directly through light-heat-effects or indirectly through others, with the light-thermo-therapy interrelated effects conditional is. , for example pain-relief, decrease of the joint-stiff-ness, relief of Muskelspasmen, with tension-syndromes, for example tension-headache, Zervikozephalgie, light-heat can reduce an ongoing the isometrische muscle-contraction and the local less-circulation walking around with it, sodass also through it pain that and troubles is hindered. Also results, that show, are available this that through heat-receptors of the skin in the neck of the activity from gamma - fibers and with it also the excitability of musculature is reduced.

However, a light-heat-treatment should with the Ltt - instrument first trauma conditional contusions after detaining a bleeding is put in, since light-heat increases the circulation only heavily and can be elevated the risk of further or reinforced bleedings. The pain-relieving effect with smaller Traumata seems with a, to hang up together reabsorption of Hämatomen him/it, accelerates.

The therapy of that is always still largely at numerous application-areas „only “empirical-well-founded

#### WHAT SAGS THE SPECIALISTS?

The biochemist Mr. Prof. Dr. Schellenberg and Mr. Prof. rer. nat. Klose decide the treatment with the Ltt - appliance as “paradigms changes”, just as the authority anesthetist and acupuncture-therapist Mrs. Dr.med. A.O. Çalkozan and the gynecologist and Obstetrics Mr. Dr.med. O. Aydurmus decides the light-thermo-therapy in the medicine with .Depressions for example, skeleton-muscle-pains “as a revolutionary development.”. Dermatology, orthopedics - sport-medicine and in specialties of the oncology in form of the palliativer therapy can become effective it. It has with acne-therapy, among others the improvement of the sore-cure-processes accelerates.

#### The first long-forward Ltt-Therapie, or the success in the practice.

I would like to tell you a dramatic case-example with the permission of a patient of me.

#### ADDRESS - PRIVATE

#### Practice-stamps

With Mrs. D.K. be it about a condition after triple disk-operation, after it could not run you with your own strength independently, Mrs. K. Schmerzmittel had to occupy every day in uvula-form. These analgesics had following side-effects: A stomach lining - ulcer a longer hospital stay refined and was necessary. Woman D.K had after the treatment with the Ltt-Gerät. only rarely pains and also no muscle-cramps more. Analgesics - taking reduced itself. The stomach lining-ulcer is completely healed.This patient has become for 3 years with

#### Light-thermo-therapy is:

The simultaneous use of salvation-factors:

- the Fokusierete (**LAFER**) a constant observable light-radiation (yellow-light), infrared-spectrum without UV irradiation wide band infrared radiation
- Yellow-light complete recovery and improvement of the health-condition with the sick person important of the decrease of the salvation-treatment,
- Verräglichkeit, complete harmless-ness, simple applications **fast amortization of the purchase-price through short treatment-times and leaving out of expensive medications**

#### Therapy indications with the light-thermo-therapy appliance

- Saisonale dependent depressions - SAD
- Arthrose and Osteoarthritis pains, (bones and Gelenksentsendung)
- Myalgie, skin-illnesses,
- Sore-cure accelerated.

#### Rental fee:

Ltt instrument for three-months for

**Patienten practices € 115.00**

With purchase credited / plus shipping and postage

#### Endpreis of the appliance:

Ltt light-thermo-therapy instrument € 399.00

You can order the appliance to the light-thermo-therapy under following addresses:
